

AMENDMENTS TO THE SPECIFICATION

Please amend the Specification as follows:

Amend the paragraph at page 6, line 19-page 7, line 2, as follows:

FIG. 3 is a screen shot illustrating an exemplary implementation of the tree-based GUI shown in FIG. 2. The device node labeled "Library 1 – AutoChanger" has been selected in the Jtree 36, thereby causing a valid list of commands for this device to be displayed in the Jlist 35. Step 1 in FIG. 3 is an initialization step that initializes all of the devices belonging to the steps, namely, an AutoChanger and tape drives 1 and 2. The other steps correspond to various operations performed by the AutoChanger in conjunction with the drives, such as loading and unloading particular tapes onto and from the drives. It can be seen that the names of the machine control sequence, the devices and the commands are easily understandable, which facilitates creating and editing the machine control sequences.
